Additional resources: Support vector classification

This reference document is designed to complement and enhance the material we have covered on support vector classification.

References:

1. A video on the fundamentals of support vector machines:

   - Mathematical explanation of SVMs

2. Four videos from the ISLR support vector machines chapter:

   - ISLR Chapter 9: Support vector machines

3. A video walk-through on how support vector machines work, including a visual representation of support vectors, margins, and hyperplanes and a step-by-step implementation of SVMs in Python:

   - Math-lite explanation of SVMs using examples with Python code
